Author Index to Volume 4

References with (E) indicate Errata. Volume number (boldface) and year are included in this index. It will be noted that there are no references to "see someone else" in the Author Index. Although it has meant a little duplication, there have been included under each author all articles in which he was author or co-author. All articles in which the author has participated are arranged in the chronological order of publication. A bibliography with author names arranged as in the original article is obtained by insertion of the author's name in the indicated (——) space under each indexed name.

Abraham, Philip B. and George H. Weiss. Evaluation of certain sums arising in chemical physics. **4:** 1115—1963
Aizu, Kêitsiro. Parameter differentiation of quantum-mechanical linear operators. **4:** 762—1963
Amar, V., M. Lucchini, and P. G. Sona. Group properties of free-field equations. **4:** 465—1963
Andersen, Hans C. and Irwin Oppenheim. Modified Langevin equation for the description of Brownian motion. **4:** 1367—1963
Araki, Huzihiro
—— **and E. J. Woods.** Representations of the canonical commutation relations describing a nonrelativistic infinite free Bose gas. **4:** 637—1963
—— A lattice of Von Neumann algebras associated with the quantum theory of a free Bose field. **4:** 1343—1963
Arnowitt, R. and S. Deser. Note on uniqueness of canonical commutation relations. **4:** 615—1963
Aviles, Joseph B., Jr. *N*-body Bose system with a finite number of states. I. Irreducible representations. **4:** 473—1963

Babbitt, Donald G. A summation procedure for certain Feynman integrals. **4:** 36—1963
Baird, G. E. and L. C. Biedenharn. On the representations of the semisimple Lie groups. II. **4:** 1449—1963
Bakshi, Pradip M.
—— **and Kalyana T. Mahanthappa.** Expectation value formalism in quantum field theory. I. **4:** 1—1963
—— **and Kalyana T. Mahanthappa.** Expectation value formalism in quantum field theory. II. **4:** 12—1963
Balescu, R. Kinetic equation for an unstable plasma. **4:** 1009—1963
Barut, A. O. and J. Dilley. Behavior of the scattering amplitude for large angular momentum. **4:** 1401—1963
Bazley, Norman W. and David W. Fox. Lower bounds for energy levels of molecular systems. **4:** 1147—1963
Bearman, R. J.
——, **Helfand E., and V. S. Vaidhyanathan.** Theory of the Soret effect in electrolytic solutions. **4:** 160—1963
Bednarz, Roman J. and Janusz R. Mika. Energy-dependent Boltzmann equation in plane geometry. **4:** 1285—1963
Belinfante, Johan G. and Burhan C. Unal. Potential scattering. **4:** 372—1963
Bessis, D. and F. Pham. Complex singularities in production amplitudes. **4:** 1253—1963
Betts, D. D., H. Schiff, and W. B. Strickfaden. Approximate solution of a nonlinear field equation. **4:** 334—1963
Biedenharn, L. C.
—— On the representations of the semisimple Lie groups. I. The explicit construction of invariants for the unimodular unitary group in *N* dimensions. **4:** 436—1963
Baird, G. E. and ——. On the representations of the semisimple Lie groups. II. **4:** 1449—1963
Bragg, Lincoln E.
—— **and Bernard D. Coleman.** On strain energy functions for isotropic elastic materials. **4:** 424—1963
—— **and Bernard D. Coleman.** A thermodynamical limitation on compressibility. **4:** 1074—1963
Brysk, Henry. Determinantal solution of Fredholm equation with Green's function kernel. **4:** 1536—1963
Burgoyne, P. N. Remarks on the combinatorial approach to the Ising problem. **4:** 1320—1963

Calogero, Francesco. Note on the Riccati equation. **4:** 427—1963
Case, K. M. and P. F. Zweifel. Existence and uniqueness theorems for the neutron transport equation. **4:** 1376—1963
Chakrabarti, A.
—— Canonical form of the covariant free-particle equations. **4:** 1215—1963
—— Relativistic position operator for free particles. **4:** 1223—1963
Challifour, J. and R. J. Eden. Regge poles and branch cuts for potential scattering. **4:** 359—1963
Chambers, Ll. G. Comparison of two generalizations of Maxwell's equations involving creation of charge. **4:** 1373—1963
Chan, Hong-Mo. Real unitary representation of the many-channel *S* matrix for complex *l* and *E*. **4:** 1042—1963
Chisholm, J. S. R. Solution of linear integral equations using Padé approximants. **4:** 1506—1963
Cohen, E. G. D. On the kinetic theory of dense gases. **4:** 183—1963
Coldwell-Horsfall, Rosemary A. and Alexei A. Maradudin. Erratum: Zero-point energy of an electron lattice. **4:** 582—1963
Coleman, Bernard D.
Bragg, Lincoln E. and ——. On strain energy functions for isotropic elastic materials. **4:** 424—1963
Bragg, Lincoln E. and ——. A thermodynamical limitation on compressibility. **4:** 1074—1963
Corson, Edward M.
—— Unified variational formulation of classical and quantum dynamics. I. **4:** 42—1963
—— Unified variational formulation of classical and quantum dynamics. II. **4:** 519—1963
Currie, Douglas G. Interaction *contra* classical relativistic Hamiltonian particle mechanics. **4:** 1470—1963

Das, A. Complex scalar field in general relativity. **4:** 45—1963
Dashen, Roger F. New approach to low-energy potential scattering. **4:** 388—1963
De Dominicis, Cyrano. Variational statistical mechanics in terms of "observables" for normal and superfluid systems. **4:** 255—1963
deGroot, S. R. On the development of nonequilibrium thermodynamics. **4:** 147—1963
Derrick, G. H. Representation of annihilation operators in the space of periodic functions. **4:** 663—1963

Case, K. M. and ——. Existence and uniqueness theorems for the neutron transport equation. 4: 1376—1963

Analytic Subject Index to Volume 4

Continuum Mechanics

On Strain Energy Functions for Isotropic Elastic Materials, Lincoln E. Bragg and Bernard D. Coleman. 4: 424—1963

Quadratic Invariants of Surface Deformations and the Strain Energy of Thin Elastic Shells, Hyman Serbin. 4: 838—1963

A Thermodynamical Limitation on Compressibility, Lincoln E. Bragg and Bernard D. Coleman. 4: 1074—1963

Differential and Integral Equations

Determinantal Solution of Fredholm Equation with Green's Function Kernel, Henry Brysk. 4: 1536—1963

Expansions Associated with a Pair of Singular First-Order Differential Equations, B. W. Roos and W. C. Sangren. 4: 999—1963

Lie Algebraic Solution of Linear Differential Equations, James Wei and Edward Norman. 4: 575—1963

New Method for Solving Eigenvalue Problems, Tatuya Sasakawa. 4: 970—1963

Note on the Global Validity of the Baker-Hausdorff and Magnus Theorems, James Wei. 4: 1337—1963

Note on the Riccati Equation, Francesco Calogero. 4: 427—1963

Solution of the Cauchy Problem for Laplace's Equation in Axially Symmetric Systems, Kenneth J. Harker. 4: 993—1963

The Solution of Linear Integral Equations Using Padé Approximants, J. S. R. Chisholm. 4: 1506—1963

Electrostatics and Maxwell Theory

Charged Spheroid in Cylinder, W. R. Smythe. 4: 833—1963

A Mathematical Analysis on the Effect of a Prolate Spheroidal Core in a Magnetic Dipole Field, Mohammed Azizul Islam. 4: 1206—1963

Perturbation Approach to the Electrostatic Problem for Irregularly Shaped Conductors, Victor A. Erma. 4: 1517—1963

Uniqueness and Existence of the Solution to the Static London-Maxwell Equations in Two Dimensions, Farouk Odeh. 4: 141—1963

Field Theory, Axiomatic Quantum

Axiomatic Perturbation Theory. II. Partial Sum Formalism, H. M. Fried. 4: 451—1963

Continuous Representation Theory I. On the Postulates of Continuous Representation Theory, John R. Klauder. 4: 1055—1963

Continuous Representation Theory II. A Generalized Relation Between Quantum and Classical Dynamics, John R. Klauder. 4: 1058—1963

Kinematics of the Relativistic Two-Particle System, Alan J. Macfarlane. 4: 490—1963

A Lattice of Von Neumann Algebras Associated with the Quantum Theory of a Free Bose Field, Huzihiro Araki. 4: 1343—1963

Local Commutativity and the Analytic Continuation of the Wightman Function, Yukio Tomozawa. 4: 1240—1963

Interaction *contra* Classical Relativistic Hamiltonian Particle Mechanics, Douglas G. Currie. 4: 1470—1963

The Nature of the Axioms of Relativistic Quantum Field Theory. II, E. C. G. Sudarshan. 4: 1029—1963

On the Canonical Form of the Covariant Free-Particle Equations, A. Chakrabarti. 4: 1215—1963

On the Relativistic Position Operator for Free Particles, A. Chakrabarti. 4: 1223—1963

Quantum Field-Theory Model whose Truncated Vacuum Expectation Values Vanished beyond Some Order, O. W. Greenberg and A. L. Licht. 4: 613—1963

Reduction of S-Matrix Elements, A. Syed. 4: 797—1963

Strict Localization, A. L. Licht. 4: 1443—1963

Structure of the Two-Point Function, O. Steinmann. 4: 583—1963

Wigner-Eckart Theorem and Simple Lie Groups, Jean Ginibre. 4: 720—1963

Field Theory, Quantum

Approximate Solution of a Nonlinear Field Equation, D. D. Betts, H. Schiff, and W. B. Strickfaden. 4: 334—1963

A Comparison of Two Generalizations of Maxwell's Equations Involving Creation of Charge, Ll. G. Chambers. 4: 1373—1963

Expectation Value Formalism in Quantum Field Theory. I, Pradip M. Bakshi and Kalyana T. Mahanthappa. 4: 1—1963

Expectation Value Formalism in Quantum Field Theory. II, Pradip M. Bakshi and Kalyana T. Mahanthappa. 4: 12—1963

Generalized "Cross-Correlation" Field Quantities as Solutions of Field Equations, Philip R. Karr. 4: 1037—1963

Mechanical Model for Quantum Field Theory, Asher Peres. 4: 332—1963

Method for Construction of Unitary Operators in Quantum Field Theory, Paul H. Moravek and David W. Joseph. 4: 1363—1963

Remarks on the Type of Von Neumann Algebras of Local Observables in Quantum Field Theory, Richard V. Kadison. 4: 1511—1963

Scattering, Weak Decays, and Final-State Interactions in Model Theories in a Dressed-Particle Picture, Kurt Haller. 4: 323—1963

Group Theory

Bases for the Irreducible Representations of the Unitary Groups and Some Applications, Marcos Moshinsky. 4: 1128—1963

Equivalence and Antiequivalence of Irreducible Sets of Operators. I. Finite Dimensional Spaces, J. S. Lomont, H. E. Moses, and Kwang Yu. 4: 420—1963

Invariant Operators of the Unitary Unimodular Group in n Dimensions, Abraham Klein. 4: 1283—1963

On the Representations of the Semisimple Lie Groups. I. The Explicit Construction of Invariants for the Unimodular Unitary Group in N Dimensions, L. C. Biedenharn. 4: 436—1963

On the Representation of the Semisimple Lie Groups. II, G. E. Baird, and L. C. Biedenharn. 4: 1449—1963

Particle Charge Symmetries as R_s Subgroups, D. C. Peaslee. 4: 910—1963

Partition Function for Certain Simple Lie Algebras, Jan Tarski. 4: 569—1963

Representation Theory for Nonunitary Groups, John O. Dimmock. 4: 1307—1963

Symmetry Functions of the Cube, George T. Trammell. 4: 431—1963

Group Theory and Invariance Principles
Derivation of the Gell-Mann–Okubo Mass Formula, H. Goldberg and Y. Lehrer-Ilamed. 4: 501—1963
Group Properties of Free-Field Equations, V. Amar, M. Lucchini, and P. G. Sona. 4: 465—1963
Possible Schemes for Global Symmetry, David R. Speiser and Jan Tarski. 4: 588—1963
Principle of General Q Convariance, D. Finkelstein, J. M. Jauch, S. Schiminovich, and D. Speiser. 4: 788—1963
Quaternionic Representations of Compact Groups, D. Finkelstein, J. M. Jauch, and D. Speiser. 4: 136—1963
Symmetry in Quantum Theory, Gérard Emch and Constantin Piron. 4: 469—1963

Lattice Vibrations
Computer Studies of Energy Sharing and Ergodicity for Nonlinear Oscillator Systems, Joseph Ford and John Waters. 4: 1293—1963
Nonlinear Coupled Oscillators. I. Perturbation Theory; Ergodic Problem, E. Atlee Jackson. 4: 551—1963
Nonlinear Coupled Oscillators. II. Comparison of Theory with Computer Solutions, E. Atlee Jackson. 4: 686—1963
The Line Shape in a Harmonic Lattice, Robert Englman and Peretz Levi. 4: 105—1963
Erratum: Zero-Point Energy of an Electron Lattice, Rosemary A. Coldwell-Horsfall and Alexei A. Maradudin. 4: 582—1963

Nonequilibrium Thermodynamics
On the Development of Nonequilibrium Thermodynamics, S. R. de Groot. 4: 147—1963
Theory of the Soret Effect in Electrolytic Solutions, E. Helfand, R. J. Bearman, and V. S. Vaidhyanathan. 4: 160—1963
Thermodynamics of Electrical Networks and the Onsager–Casimir Reciprocal Relations, J. Meixner. 4: 154—1963

Quantum Theory
Approximate Evaluation of Feynman Functional Integrals, Gerald Rosen. 4: 1327—1963
Computation of Matrix Elements of Integrable Nuclear Two-Particle Interaction Operators, R. K. Nesbet. 4: 1262—1963
Density Matrices Arising from Incomplete Measurements, Eyvind H. Wichmann. 4: 884—1963
Eigenfunction Form of the Nonrelativistic Coulomb Green's Function, Koichi Mano. 4: 522—1963
Electrostatic Interactions in Complex Electron Configurations, B. G. Wybourne. 4: 354—1963
Galilei Group and Nonrelativistic Quantum Mechanics, Jean-Marc Levy-Leblond. 4: 776—1963
Generalized Momentum Operators in Quantum Mechanics, Peter D. Robinson and Joseph O. Hirschfelder. 4: 338—1963
Invariant Solutions of the Exact Bethe–Salpeter Equation in General-Mass Case, Noboru Nakanishi. 4: 1229—1963
Irreducible Representations of Generalized Oscillator Operators, T. F. Jordan, N. Mukunda, and S. V. Pepper. 4: 1089—1963
Lower Bounds for Energy Levels of Molecular Systems, Norman W. Bazley and David W. Fox. 4: 1147—1963
N-Dimensional Total Orbital Angular-Momentum Operator, Kenneth D. Granzow. 4: 897—1963
Normalization Condition for the Bethe–Salpeter Wavefunction and a Formal Solution to the Bethe–Salpeter Equation, Iwao Sato. 4: 24—1963
Note on Uniqueness of Canonical Commutation Relations, R. Arnowitt and S. Deser. 4: 615—1963
On Coupled Schrödinger Equations and Statistical Boundary Conditions, C. Dullemond. 4: 1415—1963
On the Nonorthogonality of Generalized Momentum Eigenfunctions in Quantum Mechanics, Peter D. Robinson. 4: 348—1963
Parameter Differentiation of Quantum-Mechanical Linear Operators, Kêitsiro Aizu. 4: 762—1963
Relativistic Invariance and the Square-Root Klein–Gordon Equation, J. Sucher. 4: 17—1963
Remarks on the Double Dispersion Approach to the Bethe–Saltpeter Equation, Noboru Nakanishi. 4: 1235—1963
Representation of Annihilation Operators in the Space of Periodic Functions, G. H. Derrick. 4: 663—1963
Spin-Component Analysis of Single Determinant Wavefunctions, Fukashi Sasaki and Kimio Ohno. 4: 1140—1963
A Summation Procedure for Certain Feynman Integrals, Donald G. Babbitt. 4: 36—1963
Theorem on Energy Shifts due to a Potential in a Large Box, Fumiaki Iwamoto. 4: 809—1963
A Unified Variational Formulation of Classical and Quantum Dynamics, Edward M. Corson. 4: 42—1963
Unified Variational Formulation of Classical and Quantum Dynamics. II, Edward M. Corson. 4: 519—1963

Relativity, General
Errata: An Approach to Gravitational Radiation by a Method of Spin Coefficients, E. Newman and R. Penrose. 4: 998—1963
Canonical Variables for the Interacting Gravitational and Dirac Fields, T. W. B. Kibble. 4: 1433—1963
A Class of Null Flat-Space Coordinate Systems, E. T. Newman and T. W. J. Unti. 4: 1467—1963
Complex Scalar Field in General Relativity, A. Das. 4: 45—1963
Divergence Conditions and the Gravitational Field Equations, Heinz R. Pagels. 4: 731—1963
Distortion in the Metric of a Small Center of Gravitational Attraction due to its Proximity to a Very Large Mass, F. K. Manasse. 4: 746—1963
Empty-Space Generalization of the Schwarzschild Metric, E. Newman, L. Tamburino, and T. Unti. 4: 915—1963
Fermi Normal Coordinates and Some Basic Concepts in Differential Geometry, F. K. Manasse and C. W. Misner. 4: 735—1963
The Flatter Regions of Newman, Unti, and Tamburino's Generalized Schwarzschild Space, Charles W. Misner. 4: 924—1963
Generalization of a Theorem by Goldberg and Sachs, I. Robinson and A. Schild. 4: 484—1963
Initial-Value Problem on Einstein-Rosen Manifolds, Richard W. Lindquist. 4: 938—1963
Observable Properties of Large Relativistic Masses, A. W. K. Metzner. 4: 1194—1963
A Remarkable Representation of the 3 + 2 de Sitter Group, P. A. M. Dirac. 4: 901—1963
Undulatory Riemannian Spaces, C. Lanczos. 4: 951—1963

Scattering
Asymptotic Behavior of Schrödinger Scattering Amplitudes, L. Sartori. 4: 1408—1963
Behavior of the Scattering Amplitude for Large Angular Momentum, A. O. Barut and J. Dilley. 4: 1401—1963
The Diffraction of Waves by a Penetrable Ribbon, C. Yeh. 4: 65—1963
The Inverse Problem in the Quantum Theory of Scattering, L. D. Faddeyev (translated by B. Seckler). 4: 72—1963
Low-Energy Expansion of Scattering Phase Shifts for

Long-Range Potentials, Bertram R. Levy and Joseph B. Keller, 4: 54—1963
Mathematical Deductions from Some Rules Concerning High-Energy Total Cross Sections, C. N. Yang. 4: 52—1963
New Approach to Low-Energy Potential Scattering, Roger F. Dashen. 4: 388—1963
A New Small-Angle X-Ray Scattering Calculation, William S. Rothwell. 4: 1334—1963
Partial Wave Analysis of the Scattering of Charged Spinless Particles, J. H. Hetherington. 4: 357—1963
Real Unitary Representation of the Many-Channel S Matrix for Complex l and E, Hong-Mo Chan. 4: 1042—1963
Regularity of the T Matrix in the Case of Dirac Potential Scattering, Antonio Pagnamenta. 4: 1020—1963
Relativistic Coulomb Scattering, Bernard Rosen. 4: 392—1963
Relativistic Potential Scattering, Reese T. Prosser. 4: 1048—1963
Three-Particle Scattering. I. Planar Case, R. C. Whitten. 4: 622—1963
Transition Matrix for Nucleon-Nucleon Scattering. II, K. L. Kowalski and D. Feldman. 4: 507—1963

Singularities in Propagators and Scattering Amplitudes
Acnodes and Cusps and the Mandelstam Representation, Jamal N. Islam. 4: 872—1963
Complex Singularities in Production Amplitudes, D. Bessis and F. Pham. 4: 1253—1963
External-Mass Singularity, Noboru Nakanishi. 4: 1539—1963
Fundamental Properties of Perturbation-Theoretical Integral Representations. II, Noboru Nakanishi. 4: 1385—1963
High-Energy Behavior in Perturbation Theory, J. C. Polkinghorne. 4: 503—1963
High-Energy Behavior in Perturbation Theory. II, J. C. Polkinghorne. 4: 1396—1963
High-Energy Behavior of a Certain Class of Scattering Amplitudes in Perturbation Theory, N. H. Fuchs. 4: 617—1963
More Integral Representations for Scattering Amplitudes with Complex Singularities, R. E. Norton, C. Fronsdal, and K. T. Mahanthappa. 4: 859—1963
Errata: Nonrelativistic S-Matrix Poles for Complex Angular Momenta, R. G. Newton. 4: 1342—1963
Potential Scattering, Johan G. Belinfante and Burhan C. Unal. 4: 372—1963
Propagator Ghosts and Regge Poles, H. M. Fried and J. G. Taylor. 4: 727—1963
Regge Poles and Branch Cuts for Potential Scattering, J. Challifour and R. J. Eden. 4: 359—1963
Regge Poles in High-Energy Potential Scattering, S. Tani. 4: 1258—1963
Singularities of the Four-Point Function in Perturbation Theory with Variable Masses. Francis R. Halpern. 4: 879—1963
Singularities of Regge Trajectories and Asymptotes to Landau Curves, J. C. Polkinghorne. 4: 1393—1963
Zeros of Hankel Functions and Poles of Scattering Amplitudes, Joseph B. Keller, S. I. Rubinow, and Max Goldstein. 4: 829—1963

Statistical Mechanics of Fluids and Many-Body Problems
Asymptotic Behavior of the Radial Distribution Function, J. L. Lebowitz and J. K. Percus. 4: 248—1963
Asymptotic Form of the Proper Self-Energy Function in Many-Particle Systems, Donald R. Fredkin. 4: 634—1963
Cluster Development in an N-Body Problem, F. Y. Wu. 4: 1438—1963
Convergence of Fugacity Expansions for Fluids and Lattice Gases, Oliver Penrose. 4: 1312—1963
Formulation of the Many-Body Problem for Composite Particles, M. Girardeau. 4: 1096—1963
Generalized Dielectric Function for Classical Many-Body Systems, Amiram Ron. 4: 811—1963
Hydrodynamics of a Superfluid Condensate, Eugene P. Gross. 4: 195—1963
Integral Equations and Inequalities in the Theory of Fluids, J. L. Lebowitz and J. K. Percus. 4: 1495—1963
Lorentz–Lorenz and Sellmeier Formulas in Irregular Gases, Leonard S. Taylor. 4: 824—1963
A Microscopic Approach to Superfluidity and Superconductivity, Paul C. Martin. 4: 208—1963
N-Body Bose System with a Finite Number of States. I. Irreducible Representations, Joseph B. Aviles, Jr. 4: 473—1963
New Method in the Theory of Imperfect Gases and Liquids, Elliott Lieb. 4: 671—1963
The Remainder in Mayer's Fugacity Series, Oliver Penrose. 4: 1488—1963
Representations of the Canonical Commutation Relations Describing a Nonrelativistic Infinite Free Bose Gas, H. Araki and E. J. Woods. 4: 637—1963
Some Analytic Properties of Green Functions and Self-Energy Parts for a System of Interacting Bosons, W. E. Parry and R. E. Turner. 4: 530—1963
Some Properties of the Reduced Density Matrix, C. N. Yang. 4: 418—1963
Statistical Thermodynamics of Nonuniform Fluids, J. L. Lebowitz and J. K. Percus. 4: 116—1963
Variational Statistical Mechanics in Terms of "Observables" for Normal and Superfluid Systems, C. Dominicis. 4: 255—1963

Statistical Mechanics of One-Dimensional Systems
An Exactly Soluble Model of a Many-Fermion System, J. M. Luttinger. 4: 1154—1963
Exact Statistical Mechanics of a One-Dimensional System with Coulomb Forces. III. Statistics of the Electric Field, Andrew Lenard. 4: 533—1963
Note on the One-Dimensional Gas of Impenetrable Point-Particle Bosons, T. D. Schultz. 5: 666—1963
On the van der Waals Theory of the Vapor–Liquid Equilibrium. I. Discussion of a One-Dimensional Model, M. Kac, G. E. Uhlenbeck, and P. C. Hemmer. 4: 216—1963
On the van der Waals Theory of the Vapor–Liquid Equilibrium. II. Discussion of the Distribution Functions, G. E. Uhlenbeck, P. C. Hemmer, and M. Kac. 4: 229—1963

Statistical Thermodynamics, Foundations
Asymptotic Form of the Structure Function for Real Systems, P. Mazur and J. van der Linden. 4: 271—1963

Statistics, Lattice
Asymptotic Form of the Coefficients of Some Ising-Model Series, B. W. Ninham. 4: 679—1963
Binary Kernel Formulation of a Heisenberg Model of Ferromagnetism, Newton I. Greenberg. 4: 405—1963
Errata: Cluster Sums for the Ising Model, G. S. Rushbrooke and H. I. Scoins. 4: 998—1963
Addendum: Combinatorial Aspects of the Ising Model for Ferromagnetism. I. A Conjecture of Feynman on Paths and Graphs, S. Sherman. 4: 1213—1963
Correlations and Spontaneous Magnetization of the Two-

Dimensional Ising Model, Elliott W. Montroll, Renfrey B. Potts, and John C. Ward. 4: 308—1963
Dimer Statistics and Phase Transitions, P. W. Kasteleyn. 4: 287—1963
Evaluation of Certain Sums Arising in Chemical Physics, Philip B. Abraham and George H. Weiss. 4: 1115—1963
Lattice Statistics—A Review and an Exact Isotherm for a Plane Lattice Gas, Michael E. Fisher. 4: 278—1963
The Number of Distinct Sites Visited in a Random Walk on a Lattice, George H. Vineyard. 4: 1191—1963
On the Number of Self-Avoiding Walks, Harry Kesten. 4: 960—1963
Perpendicular Susceptibility of the Ising Model, Michael E. Fisher. 4: 124—1963
Remarks on the Combinatorial Approach to the Ising Problem, P. N. Burgoyne. 4: 1320—1963
Study of Several Lattice Systems with Long-Range Forces, M. Kac and E. Helfand. 4: 1078—1963

Stochastic Equations
Modified Langevin Equation for the Description of Brownian Motion, Hans C. Andersen and Irwin Oppenheim. 4: 1367—1963
Statistical Behavior of Linear Systems with Randomly Varying Parameters, M. A. Leibowitz. 4: 852—1963
Stochastic Liouville Equations, Ryogo Kubo. 4: 174—1963
Thermal Fluctuations in Nonlinear Systems, N. G. van Kampen. 4: 190—1963

Statistical Mechanics, Nonequilibrium and Transport Theory
Asymptotic Wave Vector and Nonrelativistic Perturbation Theory, S. Teitler. 4: 1119—1963
Energy-Dependent Boltzmann Equation in Plane Geometry, Roman J. Bednarz and Janusz R. Mika. 4: 1285—1963
Existence and Uniqueness Theorems for the Neutron Transport Equation, K. M. Case and P. F. Zweifel. 4: 1376—1963
Generalized Master Equation and t-Matrix Expansion, Robert J. Swenson. 4: 544—1963
Kinetic Equation for an Unstable Plasma, R. Balescu. 4: 1009—1963
Kinetic Equations for Electrons and Phonons, Amiram Ron. 4: 1182—1963
Lyapunov's Stability Criteria for Plasmas, T. K. Fowler. 4: 559—1963
The Master Equation with Special Transition Probabilities, E. Verboven. 4: 266—1963
Moments of the Neutron Time-Energy Distribution and the Use of Random Functionals, Martin A. Leibowitz. 4: 446—1963
On a New Method in the Theory of Irreversible Processes, Edward A. Frieman. 4: 410—1963
On the Kinetic Theory of Dense Gases, E. G. D. Cohen. 4: 183—1963
Relativistic Kinetic Theory of a Simple Gas, W. Israel. 4: 1163—1963
Structure of the Three-Particle Scattering Operator in Classical Gases, P. Résibois. 4: 166—1963
Theory of Transport Coefficients in Low-Density Gases, James A. McLennan Jr. and Robert J. Swenson. 4: 1527—1963
Time-Dependent Statistics of the Ising Model, Roy J. Glauber. 4: 294—1963

Statistical Theory of Energy Levels of Complex Systems
Random Matrix Diagonalization—Some Numerical Computations, C. E. Porter. 4: 1039—1963
Reduced Width Amplitude Distributions and Random Sign Rules in R-Matrix Theory, Theodore J. Krieger and Charles E. Porter. 4: 1272—1963
Reduced Width Amplitude Distributions for the Unitary Ensemble, Nazakat Ullah. 4: 1279—1963
Statistical Theory of the Energy Levels of Complex Systems. IV, Freeman J. Dyson and Madan Lal Mehta. 4: 701—1963
Statistical Theory of the Energy Levels of complex Systems. V, Madan Lal Mehta and Freeman J. Dyson. 4: 713—1963
